Profile

Interactive Digital Art & Design (IDAD) student with a strong focus on 2D art, 3D art, game development and creative technologies. Experienced in leading visual production for team-based projects including the delivery of a client-driven game for Wexford County Council. Skilled in Blender, Maya and Godot with supporting knowledge of Python and Java.

A collaborative and detail-oriented creator with experience presenting to professional audiences and contributing to competitive game development projects. Passionate about combining artistic design with technical skills to produce engaging interactive experiences.

Achievements

Lead Artist — Game Project (Award Winner), Wexford County Council

Jan 2025 – Jun 2025

- Won a competitive college project in collaboration with Wexford County Council.
- Led visual development for a 6-month team project.
- Created and managed 2D/3D assets, ensuring consistent artistic direction.
- Collaborated with developers and designers to deliver a finished product to an external client.

Lead Artist — Game Project (Runner-Up), Wexford County Council

Jan 2025 – March 2025

- Appointed Lead Artist for a runner-up project in the same competitive programme.
- Created the full set of game assets, ensuring visual consistency and quality.
- Worked directly with the developer to integrate art assets and support implementation.

Guest Speaker — Wexford Tech Meetup (Sponsored by Scurri)

Oct 2025

- Invited to present at a regional tech meetup.
- Showcased the development process of a client-based game project.
- Spoke to a professional audience about team collaboration and production.

Game Submission — Dingle Game Festival

March 2023

- Developed and submitted a game project to **Dingle Game Festival.**

- Selected to progress through the initial competition rounds.
- Competed among student game development teams from across Ireland.

Final Year Project — Procedural Low-Poly Tree Generator (Godot Plugin)

- Developed a procedural tree generator plugin using Godot and Python.
- Created a system for generating customizable low-poly 3D trees.
- Designed assets suitable for 3D printing and animation workflows (Blender/Maya).
- Built and published a supporting project website.

Technical Skills:

- **3D & Design:** Blender, Maya, Photoshop, Substance
- **Game Development:** Godot
- **Programming:** Java, Python, HTML, CSS
- **3D Printing:** ideaMaker (model preparation & slicing)
- **Tools & Version Control:** GitHub, Aseprite, DaVinci Resolve
